RE: Referral on Proposed Climate Risk Enhancements

The NAIC's Climate Resiliency (EX) Task Force is charged with evaluating financial regulatory approaches to climate risk and resiliency in coordination with other relevant committees, task forces and working groups, including those under the Financial Condition (E) Committee. As part of its efforts to address this charge, the Task Force designated a Solvency Workstream to explore potential enhancements to existing solvency monitoring processes in this area.

During 2021, the Solvency Workstream held a series of public panels on various climate solvency related topics which included among other things, a high-level summary of existing regulatory tools in the space. Near the end of 2021, the Solvency Workstream released a series of questions intended to solicit input on potential enhancements to the existing regulatory tools. As a result of comments received, and general support for enhancements to the NAIC's Financial Analysis Handbook, the workstream suggests the Working Group consider modifications to incorporate particular concepts as it pertains to climate risk. Specifically, the Workstream suggests the Working Group consider modifications to incorporate procedures for utilizing the Property Casualty RBC Cat reporting data, any investment stress scenario results available from the NAIC Capital Markets Bureau, and Climate Risk Exposure Survey results (if available) in conducting ongoing financial analysis.

The proposed enhancements are presented as high-level principles for the Technical Group to consider and develop as appropriate for inclusion in the Handbook. If there are any questions regarding the proposed referral, please feel free to contact me or NAIC staff (Dan Daveline at ddaveline@naic.org) for clarification. Thank you for your consideration of this request.
